SecurityMetrics PCI DSS On-site Assessments

Simplify PCI

Whether it's to secure your customers' card data, help your business to grow, or comply with PCI requirements or mandates from your sponsoring bank, you recognize the need for certification of your business for PCI compliance.

Unfortunately, the PCI landscape can be confusing and complex. How do you know if you're doing too little or too much? While many Qualified Security Assessors (QSAs) can assess your level of compliance and recommend changes, how do you know if those recommendations are based on what you really need?

Trusted PCI Compliance Partner
As your trusted PCI compliance partner, SecurityMetrics takes the time to understand your environment and needs, and then helps you scope your compliance efforts to the levels appropriate for your organization and situation. SecurityMetrics helps you avoid the pitfalls that lead to compromised security, credit card fraud, regulatory fines, and loss of business. In addition to assessing your level of compliance, SecurityMetrics advises you on how to better simplify, streamline, and secure your processes, enabling you to achieve compliance in a way that ultimately saves you money and improves your business operations.

SecurityMetrics partners with you before, during, and after your assessment, working with you to quickly identify and resolve threats that could impact your business. By taking advantage of PCI On-site Assessments from SecurityMetrics you can:

- **Minimize the impact of PCI requirements** through scope reduction and proper segmentation of affected infrastructure areas
- **Enjoy the peace of mind** that your sensitive data is secure

- **Avoid the costs and headaches** of non-compliance fines and penalties
- **Improve business efficiency and reduce operational costs** by streamlining, securing and simplifying your day-to-day credit card operations

A Higher Standard for PCI Qualified Security Assessors

SecurityMetrics differentiates itself from other QSAs by providing PCI site assessments that enable you to benefit from the following:

- A commitment to take the time to understand your operations and processes, enabling SecurityMetrics to accurately scope the cost and effort of the assessment
- Trusted leadership and experience as a full service PCI compliance partner
- Establishment of long-term customer relationships through performance, value, and integrity rather than mandatory long-term contracts
- Simple, straightforward pricing with no hidden charges or add-on fees
- Recommendations from sponsoring or acquiring banks
- Assurance that when you have questions or support issues you can talk to a live person, not an answering machine or e-mail queue

securityMETRICS®

SecurityMetrics partners with you before, during, and after your assessment, working with you to quickly identify and resolve threats that could impact your business.

Full Service PCI Consulting and Assessment
SecurityMetrics can complete your assessment with quality results that you can trust and with minimal impact on your day-to-day business. The SecurityMetrics PCI On-site Assessment team provides you the following services:

1. **Custom Price Quote** – Instead of paying an average on-site assessment price SecurityMetrics personalizes each quote to maximize your dollars and minimize your price.

2. **Pre on-site Consulting** – Conducts initial assessment review and gap analysis, pre-assessment consulting on network design, security policy review, and on-site visit preparation.

3. **On-site Assessment** – Meets with your full team of business and technical professionals to gather accurate information to satisfy all PCI DSS requirements. Ensures efficient controls are put into place as needed to reduce PCI compliance overhead now and in the future.

4. **Post On-site Summary Report** – Provides quick, initial feedback on compliance status and remediation needs.

5. **Remediation Work** – Works with the customer to remediate any items not in compliance.

6. **PCI Report Preparation and Submission** – Documents compliance to PCI requirements, provides compliance report to customer for review, and then submits compliance status to your payment brands or acquiring bank.

Simplifying PCI Compliance
To simplify your PCI compliance efforts, when you engage SecurityMetrics for your PCI On-site Assessment, you'll also enjoy the following:

- **Full-Service Vendor** – With expertise in PCI assessments, forensic incident response, vulnerability scanning, penetration testing, security appliances, PTS, PA-DSS application security assessments, training, and consulting; SecurityMetrics is one of only a few companies that hold credentials for all aspects of PCI.

- **Open and Ongoing Relationship** – Whenever compliance questions or worries arise, SecurityMetrics' PCI compliance professionals will work with you to address your concerns.

- **Accurate and Understandable Results** – SecurityMetrics gives you the facts on every aspect of your PCI assessment through an easy-to-understand report with detailed explanations.

- **Single Point of Contact** – To keep communication lines open and eliminate confusion, SecurityMetrics assigns a single point of contact for each assessment.

- **Fair, No-Surprise Pricing** – SecurityMetrics strives to offer simple and straightforward pricing with a single bid that won't change.

- **No Long-Term Contracts** – SecurityMetrics never locks you into a long-term contract.

- **Unlimited Rescans** – Since achieving PCI Compliance is an iterative process, SecurityMetrics includes as part of its price unlimited scanning during the assessment and remediation process.

SecurityMetrics helps you avoid the pitfalls that lead to compromised security, credit card fraud, regulatory fines, and loss of business.

Global Leader in PCI Compliance
As a global leader in PCI compliance, SecurityMetrics leverages its extensive experience and expertise to simplify PCI. As your trusted PCI compliance partner, SecurityMetrics works with you before, during, and after your assessment to quickly identify threats to cardholder data and help you appropriately resolve them. SecurityMetrics advises you through the entire PCI compliance process, offering a price you can rely on, providing you accurate results, helping you understand those results, and establishing a partnership that you can trust.
